

VISUAL LEARNING STYLE

VISUAL LEARNERS prefer using images, pictures, colors, and maps to organize information and communicate with others. You can easily visualize objects, plans and outcomes in your mind's eye. You also have a good spatial sense, which gives you a good sense of direction. You can easily find your way around using maps, and you rarely get lost. When you walk out of an elevator, you instinctively know which way to turn. "Learn by seeing"

INTAKE

- lecturers who use gestures and picturesque language
- pictures, videos, posters, slides
- flowcharts
- underlining, different colors, highlighters
- textbooks with diagrams and pictures
- graphs
- symbols @ and white space

SWOT – STUDY WITHOUT TEARS

Convert your "notes" into a learnable package by reducing them (3:1)

- Use all of the techniques above
- Reconstruct the images in different ways... try different spatial arrangements.
- Redraw your pages from memory
- Replace words with symbols or initials
- Look at your pages.

OUTPUT

To perform well in any test, assignment or examination:

- Draw things, use diagrams
- Write exam answers
- Recall the pictures made by your pages
- Practice turning your visuals back into words

TIPS

Videos

Watch Video of your subject (YouTube and Khan Academy)

**Sometimes listening to someone else explain the topic helps you understand better.*

Use Flash Cards

**TRIO has flash card software in A-153 or if you would prefer, we also have blank note cards available for our students, just ask!*

Use Highlighters

**TRIO also has highlighters available; please ask staff if you need one for class.*
