

Strategic Planning Committee

01/07/21

Agenda

Area updates

Reminder from last meeting

- Current plan has been extended by 1-year-planning calendar will be one year off.
- Comments from Dr. Rice-Planning continues with the extension-data driven decisions-3 diff demos; hopefully some groups attach. Looking at all of the data reports, a lot of things went into that. Don't forget to capture that in planning. Department level, broader institutional level-whatever we can do to engage in data needs. Insurance review in 2024.
- Dr. Weiss-Academic side; go through the current plan with updated initiatives. Take a few minutes to look at it and contact me with any questions.
- Dr. Billman-Some faculty was confused on if individual classes need s.p.-they do not.
- Dr. Flannery-Look at things that move the needle forward.

IE Subcommittee (Barr)

- No new updates

IRB (Barr)

- One request from SIU grad student
 - Request was for student info to send survey
 - Requestee was sent application, never returned-if she had returned it, there would have been a meeting of the IRB. They have to prove that they're going to be good caretakers of our students' data.

Benchmarks/Key Performance Indicators (Barr)

- Updates have been added (handout)
- New matrix to map how KPI's relate to operational plan (handout)-math is still pending but it is up to date with percentages. The matrix will look different after 2020 data comes in from the pandemic.

Program Review

- All program review data collection has been returned back to division chairs.

COVID-19 SP21 Response Survey

- New follow-up survey will proceed SP21

Current 2020-21 Operational Plan Initiatives Updates

- Updates are listed on Intrinsic
- How to use data from our Key Performance Indicators (KPIs)?
 - Matrix-shows exactly where they're located in the operational plan. Some have multiple but all are referenced. Time frame will always be ongoing in the operational plan. Kyla is working on a project on students going nowhere after high school. Not sure that it can be used as a KPI but it good data. A couple of data points still need to be added.

Comments?
